SUMMARY

Entry-level Data Analyst with hands-on experience in SQL, Python, Power BI, and Tableau. Skilled in ETL processes, dashboard development, and translating complex datasets into actionable business intelligence. IBM-certified with a background in Big Data Systems and a track record of delivering statistical analysis and KPI reporting across real-world datasets.

EDUCATION

Wilfrid Laurier University

Bachelor of Computer Science | Concentration: Big Data Systems

Sep 2022 – Jun 2026

SKILLS

Languages: Python, SQL, R, VBA

Analytics & BI: Power BI, Tableau, Excel (Advanced), Streamlit, Looker Studio

Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow, Gensim

Databases & Cloud: MySQL, MongoDB, Firebase, AWS, Microsoft Azure, Google Cloud

Tools & Workflow: Spark, Flask, Git, Agile/Scrum

WORK EXPERIENCE

Data Analyst Intern

Labmentix Private Limited

Jul 2025 – Sep 2025

- Delivered actionable business intelligence across 3 end-to-end analytics projects (U.S. Airline Delay Analysis, Bike Sales Dashboard, Bird Species Observation), surfacing KPIs that directly informed stakeholder decisions.
- Built ETL pipelines using SQL and Python (Pandas) to clean and transform 5+ real-world datasets across ~50,000 records, reducing data inconsistencies by ~30% and enabling accurate KPI reporting in Power BI, Tableau, and Streamlit.
- Presented data-driven dashboards and statistical analysis findings to stakeholders in weekly Agile sprint reviews, translating business requirements into visual insights that directly guided project decisions.

PROJECTS

COVID-19 Research Trends Analysis

Python · Pandas · Gensim · Matplotlib · NLP

- Applied statistical analysis and NLP (LDA topic modeling) to 50,000+ articles from the COVID-19 dataset, identifying 10+ evolving research themes that tracked shifts in global pandemic response.
- Engineered data visualizations correlating topic drift with real-world events (policy changes, variant waves), producing findings used to prioritize future research directions and support data-driven policymaking.
- Managed full ETL workflow from raw corpus ingestion to insight delivery, processing large-scale unstructured text data using Python (Gensim, Pandas, Matplotlib) and exporting structured outputs for downstream analysis.

Bundle Delights — JA Canada Company

Excel · Shopify · HTML · CSS · JavaScript · Data Analysis

- Co-founded a gift basket e-commerce company with a 20-person team during COVID-19, leading data analysis responsibilities across the full product lifecycle.
- Analyzed sales performance, customer purchasing patterns, and inventory data in Excel, producing weekly business intelligence reports that informed pricing and product bundling decisions — contributing to ~\$1,100 in total revenue across the program.
- Built and maintained the company's Shopify storefront using HTML, CSS, and JavaScript, improving site usability and supporting a ~15% increase in conversion rate over the campaign period.

ToDoBlock App — Hackathon Project

Flutter · Dart

- Shipped a full-stack Flutter task management app within a 24-hour hackathon sprint, implementing real-time reminders and a gamified leaderboard for a team of 4 under tight delivery constraints.

Orion's Quest — NASA ISS Curriculum

VBA · Data Analysis · Research

- Led a 4-person team in a NASA ISS curriculum, analyzing real-time satellite data and delivering findings to the program's scientific review board — demonstrating end-to-end data analysis and stakeholder reporting.
- Automated data visualization and reporting workflows using VBA, cutting manual reporting time by ~40% and enabling clear, reproducible delivery of research findings.

CERTIFICATIONS

- NVIDIA – Certified Associate: Generative AI LLMs (Jun 2025)
- IBM Data Science Professional Certificate (Feb 2025)
- PCAP™ – Certified Associate: Python Programmer (Jul 2024)
